Human Resources Health & Safety

ESTABLISH AND MAINTAIN A SAFE WORK ENVIRONMENT WITH OUR HEALTH & SAFETY MODULE.

Suited to both mining and non-mining industries, Health and Safety is an easy-to-use web application which provides your personnel with the tools required to effectively manage and promote a safe work environment.

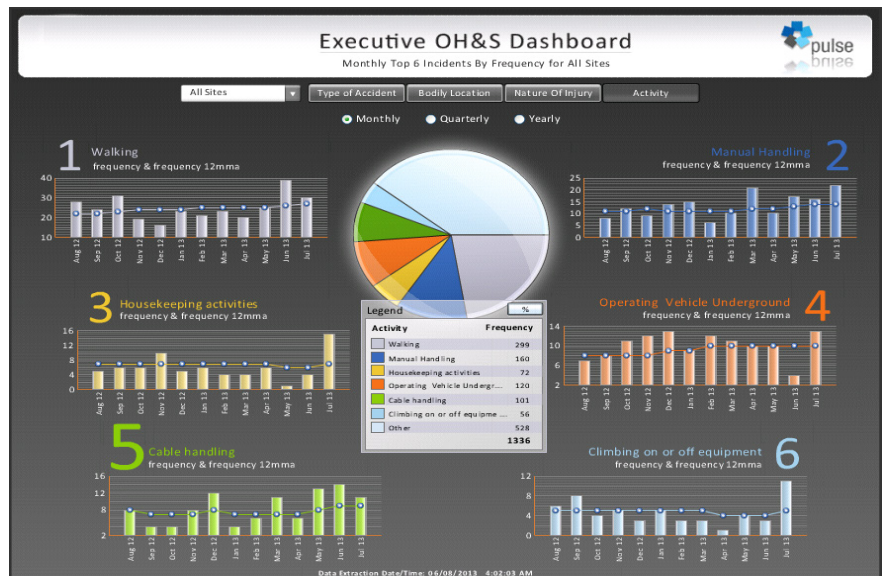

- Centralise your OHS data
- Identify, record and track site incidents
- Incident / hazard approval workflows
- Monitor work related injuries
- Automatic Authority reporting (DoPI)
- Bulk hazard loading
- Compliance with awards and legislation
- Reduce the time between reported incidents and corrective actions.

Separate or integrate this versatile system. Health and Safety is capable of independent functionality. If you want to realise its full benefits then interface with our Personnel and Operations modules. Defects and Work Orders can work together to keep your OHS up-to-date across your entire company.

THE HEALTH & SAFETY MODULE IS HIGHLY CONFIGURABLE, AND CAN BE TAILORED TO SUIT YOUR SPECIFIC ORGANISATIONAL REQUIREMENTS.

Pulse Health & Safety Web Intelligence Dashboard

DETERMINED TO BE THE ERP SOLUTION OF CHOICE FOR THE MINING INDUSTRY. PULSE MINING SYSTEMS OFFERS THE ONLY ERP DEVELOPED EXCLUSIVELY FOR THE BENEFIT OF MINING.

Benefits & Differentiators

Automatic assistance: Health and Safety knows the information you need, and will hide the rest of the information until you need it. It will also notify relevant government agencies on your behalf.

Interactive dashboard: Display and communicate important information such as accident types, commonly injured areas, locations and quantities. Ad hoc reporting capabilities are available.

Client configurable: Modify and personalise the system to match exactly what you need. Rename fields and dropdown options, toggle content visibility and set mandatory and optional fields.

Australian OHS Regulation Compliance: Includes all OHS regulation forms and quarterly reporting requirements.

Web-based and mobile compatible: Requiring only a Wi-Fi connection, individuals can send and receive notifications through designated email addresses from anywhere.

Workflow approvals: Setup workflow approvals to meet your organisations requirements. These can be as simple or as complex as required.

Health & Safety Modules

Incident entry

Incident Entry provides the functionality to prevent and manage workplace incidents. A source of information you can depend on, Incident Entry will streamline your incident reporting processes and ensure consistent and accurate information.

- Classify incidents into several categories, including personal injury, security breaches, equipment and environmental damage
- Easily identify patterns or reoccurring incidents to facilitate effective accident prevention
- Create a risk matrix by assigning risk scores to incidents based on occurrence and severity.

Potential Hazards

Take a proactive stance by identifying potential and existing hazards and improve the overall safety of your work environment. Improve the overall safety for your personnel and reduce the risk of claims, prosecution and fines to the company.

- Identify potential issues and stop them before they occur
- Manage risk assessments
- Save time on manual data entry by bulk uploading potential hazards after a safety audit.
- Create a hazard and assign it one or more corresponding actions.

Actions

Take action to remove a potential hazard or rectify an incident.

- View, assign and create actions
- Colour-coded actions based on status for easy identification
- View and assign existing actions.

Reporting

The Reporting tool provides users with a clear and current overview of Health and Safety performance. Based on data you can rely on, reporting provides a comprehensive dashboard feature. Use our predefined templates or create your own ad hoc reports to meet your specific Health and Safety requirements.

- View outstanding actions
- Receive a monthly statistics report for each of your sites with the option for a single, consolidated report.
- Sends a CMHSR Quarterly Workplace Injury Report.
