

2019.00 Generic Release Note

re

Module

All Modules and Components

Release Note – Not Required

There is no Release Note for these Update Packages for one of the following reasons:

1. The update is very minor and has no possible consequence for the updated system. E.g. a spelling mistake has been corrected. In this case the nature of the update should be evident from the Update Package description and there will be no corresponding Test Plan.
2. The update is to a process that runs behind the scenes and/or is of little or no consequence to users and/or has no visible outcome. As above, the Update Package description should provide sufficient information and there will be no corresponding Test Plan.
